About Alta Care Laboratories

Alta care laboratories is a privately owned independent multinational company founded in france with the european union as the main market. With over 20 years of experience in professional consultancy in all the stages required for manufacturing and branding, over the years alta care laboratories has produced products for other multinational companies. Alta care research and development department has handed over many innovative formulations of pharmaceutical quality to other companies throughout the years. Alta care is now also well known worldwide for being specialised in the registration of dossiers in the eu. Alta care immediately expanded its know how in the manufacture of cosmeceuticals, food supplements, nutraceuticals and biotechnology to produce an exclusively innovative line of products to complement the existing line of pharmaceuticals. Alta care laboratories is a member of the french cosmetics association cosmed.

Why To Trust Us

We at Jerjawey Aesthetics Trading work together to create a new standard through innovation and science, reaching every client with a new concept to fit their demands and provide their patients with the best results in a remarkable time.

We provide you with the finest products and choose unique, effective and with high safety measurements for our patients.

We built our name with four main pillars, those which will enable us to maintain the confidence of our clients and drive us to keep moving forward.

We are dedicated to bring the best products, compassionate to give the best solutions for beauty and aesthetics, innovative to deliver the most recent effective and safe concepts, and keen to maintain the trust of our clients.

DERMASTIR ROLLER EYE SERUM

Dermastir Roller Skin Serum Anti-wrinkle has been developed and produced by Alta Care Laboratoires for a targeted treatment of all types of wrinkles.

The beneficial anti-wrinkle effects of the serum are enhanced by a special 360° massage roller which stimulates the circulation in the skin, provides muscle relaxation, reduces puffiness and evenly distributes precious ingredients.

Dermastir Elettra is an exclusive device that transmits high frequency, alternating current to the skin through glass electrodes. The high frequency in Dermastir Elettra purifies the skin with its germicidal and antibacterial functions.

This device has also an anti-inflammatory action, which reduces redness and skin irritation, improves blood circulation, regulates sebum production and normalizes the physiological pH level.

INDICATIONS:

Combined with Dermastir serums, Elettra will stimulate, regenerate and re-activate the skin.
